## SCHOOL EDUCATION IS THE KEY TO DEVELOPING CHARACTER, BUILDING SOCIAL AND LIFE SKILLS

- It is school education that shapes a child and develops their character. A good school education is the key to building social and life skills.
- Education is the most powerful weapon which you can use to change the world," rightly said Nelson Mandela, the great anti-apartheid revolutionary. Not just soaring grades, prestigious degrees and a job with hefty salary packages later on in life, education means a lot more than these.
- School education is something that builds up the edifice of an individual's life, shapes one's life, defines one's character, morality, ideology, principles, life skills and everything that is required to lead a life besides decorating one's career.

## HOW DOES SCHOOL EDUCATION BUILD CHARACTER?

- Character building is based on six pillars – trustworthiness, respect, responsibility, fairness, caring and citizenship and all of these can be filled in a child only through adequate education.
- Producing students with good grades is not enough for helping them lead a fruitful life. This is why more focus needs to be given on preparing students with morals, ethics, soft skills.
- These values automatically make them self-sufficient from all respect to face the challenges of life and contribute to society in some positive way.
- When a child walks into the classroom for the first time and sits on a chair behind the desk, the child gets introduced to the window of knowledge to make his or her life brighter.

- It is beyond good and bad handwriting or doing home works on time or getting all spellings correct.
- It is perhaps in school that a child gets the first taste of success and failure, good manners and bad habits, friendship and competition, compassion and care, jealousy and arrogance.
- The child gradually develops a mental manual on what to do and what not to, what to accept and imbibe and what to reject and refuse, how and when to react and these come life long lessons for him or her. This is exactly why primary or elementary education in school disciplines a child and forms the most critical component of an education system.

## SCHOOL EDUCATION AND ITS GOALS

- If we assess our education system, the basic or primary level in school happens to be the most important one due to its vital goals that become the fundamentals of life for an individual.
- The major aim of basic school education is to provide assistance to a child on multiple levels.
- Starting from learning the art to think critically to striving to achieve higher standards to meeting challenges and developing citizenship and basic values to socializing, school education provides it all.

## WHY IS SCHOOL EDUCATION IMPORTANT?

- School education is a necessity for all children as it ensures the development of their cognitive, social, emotional, cultural and physical skills preparing them for further academic career, carving their character, developing their personality and setting them up for facing the challenges in life.
- Sound knowledge of language and arithmetic, values and ethics help a child grow from all facets and become successful in every sphere of professional and personal life.

### WAYS TO IMPROVE SCHOOL EDUCATION IN INDIA

- India has made considerable progress in the field of school education. Thanks to several schemes introduced by the government in the last few years that have helped in reducing drop-out rates in schools and boosted up primary school enrolments to a good extent.

- However, there are several areas where India can still make considerable progress to establish its school education system adequately
- This can be done by **leveraging technology and using its potential** to provide cost-effective and high-quality learning to the marginalized students, upgrading teachers' education and training according to the changes in student curriculum as required in the present time, building good assessment systems to efficiently measure a student's ability to learn, gain new skills and social engagement.
- It is also important to impart vocational training to children at an early age as it exposes them to the real world of work and schools must be *connected* with

- Each skill is important and has its own value in turning knowledge into performance and enhancing productivity. Hence **skill development should also be cultivated among the students** as in the present context of globalization, it is a pertinent need.
- Other ways of making school education stronger and complete are **introducing gender studies education in the school curriculum** to make children aware of gender parity from the grassroots level of learning.
- Student should focus more on skill development — both **professional skills and life skills** in order to help the students fit better in the competitive world. It is essential to have a well-defined school education system in the country for making life better for the future generation.

### IN THE INDIAN EDUCATION SYSTEM

- while we all understand how crucial education is to shape our lives, it has also been a major problem in our country. There are several issues that the Indian education system is grappled with. We cannot deny the fact that the Indian government and institutions have been working to reform the existing education model. However, there are still several issues which are required to be taken care of.
- Here are 7 immediate changes needed in the Indian education system:

### 1. ROTE LEARNING

- We have progressed with time; however, we still have not been able to move away from rote learning. While we know that IB schools are changing the education system at their level, but we also need to understand that the population that goes to IB schools is very limited in nature.
- Not everyone can afford the education system that they offer. Hence, the government needs to take the baton in their hands and eradicate rote learning from the schools at all the levels.
- The schools must be encouraged to introduce conceptual learning which avoids students to mug up what they are being taught. While this will help students to understand the concepts better, they will also be able to retain and apply them better.

### 2. EVALUATION SYSTEM

- Marks still continue to play the most important card in deciding the future of children and this often comes down upon students as a burdening factor. The pressure of marks often makes students underperform.
- Instead of focusing the evaluation on a three-hour exam, the focus of evaluation should be classroom participation by a student, projects, communication and leadership skills and extra-curricular activities.
- Only then will the students give their best and be evaluated at their best.

### 3. EQUAL RESPECT TO ALL THE SUBJECTS

- \* We continue to survive in the education system where science stream topples the stream hierarchy. Students are pushed to become a machine which only goes for high-profile subjects and subjects like languages, communications, arts are looked down and are not considered high-profile.
- \* Students should rather be pushed to pursue the subject that they like instead of creating a differentiation between subjects.

### 4. BETTER TRAINING OF EDUCATORS

- \* Teachers play the most important role in schools and hence, they should be given the best of class training. After all, they are shaping the future of the nation, the children. Teachers are often considered as second parents.
- \* Thus, they should be imparted their training in a way that they can act as parents to the children away from their homes.
- \* While teaching, they should create a congenial and home-like atmosphere where students can feel the empathy and love in the classroom and which can then be reflected in their behaviors.

### 5. INTRODUCTION OF TECHNOLOGY

- \* We all know we have incepted in the era of the fourth industrial revolution. We are living the renaissance of technology and in such a state, technology and education system cannot be kept apart.
- \* Students must be taught about technology right from the early years of their education so that it does not come like an alien thing in their later times.
- \* Indian schools must embrace technology and education with an open heart and propagate the same to the students as it is there, where their future lies.

### 6. PERSONALIZE EDUCATION

- \* Indian education needs to realize that the absorption power of every student cannot be the same. Hence, the teaching method also cannot remain the same for every student in a class of 30.
- \* Some students have faster learning pace and some are slow. Teachers must have a keen eye on observing each of their students.
- \* While it is not humanly possible for a single teacher to pay attention to every student, schools must start looking at the use of technologies like artificial intelligence and chatbots who can become the helping hand to the teachers as well as students.

### 7. TEACH THEM THE PURPOSE OF EDUCATION

- \* Our education system is still having the features what colonial educators inbuilt. Education is not always about becoming a big, rich person. It should be about humanism.
- \* Students must also be taught in-depth about the morals of life and inculcated with humanistic values. They should be taught that life is much beyond money and success is not measured in money.
- \* If the Indian education system starts taking these points into serious consideration, we can attain the level of the best education system in the world. It is high that we as a country, start taking education above the mediocre level that we have been engrained with and perceive education from the holistic approach.

Understanding The Need, basic guidelines,  
content, process for value education

Need for value education:

- × All the human beings continuously aspire for a happy life, a fulfilling and successful life and the purpose of education is to provide adequate competence to actualize this aspiration.
- × For this, first of all it is essential to understand- what is really VALUABLE for human being, and what is really conducive to happy and fulfilling life?- this is the VALUE DOMAIN.
- × Then it is essential to –How to actualize it ?How to make it happen?- this is domain of SKILLS.

- × The subject which enables us to understand “ what is valuable “ for human happiness is called VALUE EDUCATION.
- × Thus, Value Education enables us to understand our need and visualize our goals correctly and also indicate the direction of their fulfillment.
- × The value of any unit in this existence is its participation in the larger order which it is a part eg. Value of a pen is that it can write. Here writing is the participation of the pen in the bigger order in which pen, paper, human being, all are present.

Let us look at different aspect to appreciate the need for value education

- Correct identification of our aspiration
- Understanding universal human values to fulfill our aspiration in continuity
- Complimentary of values and skills
- Evaluation f our belief
- Technology and human values

### Why Value Education ?

The future of planet earth depends on Education of the Youth

# Emphasis & Impact on Professional Ethics

Presented by  
Mr.A.Jegan preeth,  
Life skill coach & MD,  
Analytics Pvt Ltd chennai.

## What are Ethics?

The Concise Oxford Dictionary defines ethics as: "Relating to morals, treating of moral questions; morally correct, honourable"

**Engineering ethics** is the field of applied ethics which examines and sets standards for engineers' obligations to the public, their clients, employers and the profession and is appropriate in all aspects of professional practice.

conduct as moralit.  
cally adv. — eth'i  
**eth-ics** (eth'iks) n.  
The study and philo  
on the determinatio  
of right conduct with  
eth-ics. 3. A

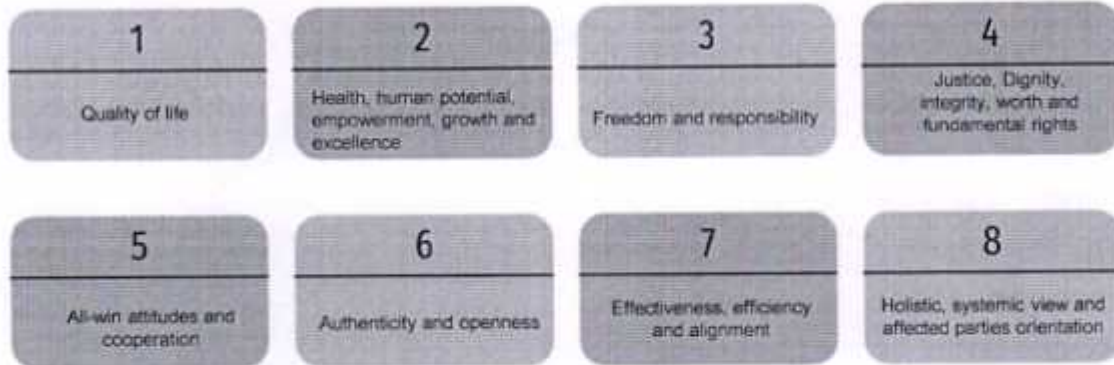

"Don't compromise yourself. You are all you've got."

Janis Joplin

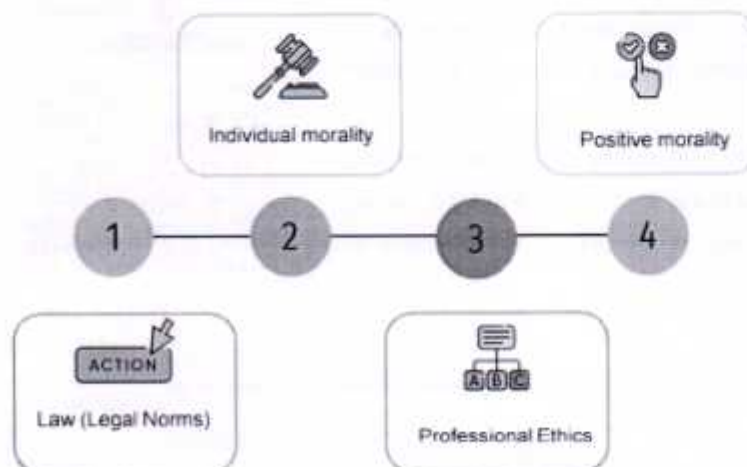

## Value Systems

*Values are the unarticulated beliefs that form the foundation for ethical behavior*

## Professional Ethics

**"It is curious - curious that physical courage should be so common in the world, and moral courage so rare"**  
**-Mark Twain**

## Ethical Issues Facing Engineers

Relationships with clients, consultants, competitors, and contractors

Ensuring legal compliance by clients, client's contractors, and others

Conflict of interest

Bribery and kickbacks, which might include:

- Gifts, meals, services, entertainment and recreation opportunities
- Treatment of confidential or proprietary information
- Consideration of the employer's assets

Outside employment/activities (moonlighting)

"Live a good, honorable life. Then when you get older and think back, you'll be able to enjoy it a second time"

The Dalai Lama

## Code of Ethics

**Respect for People's Dignity and Rights**

**Responsible Practice**

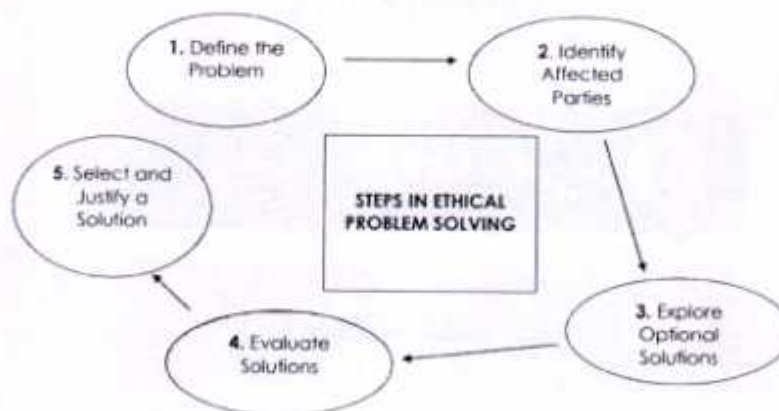

**Integrity in Relationships**

## Steps in Ethical Decision Making

There are five simple, infallible steps for resolving problems:

1. Identify the central ethical problem
2. Identify affected parties and their interests
3. Search for possible solutions for the dilemma
4. Evaluate each solution using the interests of those involved, accorded suitable priority
5. Select and justify the solution that best resolves the dilemma

To solve any problem, here are three questions to ask yourself:  
First, what could I do? Second, what could I read? And third,  
who could I ask?

Jim Rohn

## STEP 1: Identify the ethical problem

It isn't that they can't see the solution. It's that they can't see the problem.

G. K. Chesterton

What is the problem?

A problem well stated is a problem half solved.

John Dewey

A prudent question is one-half of wisdom.

Francis Bacon

## STEP 2: Identify affected parties

### Who is affected?

If you have any doubts or questions as to what the proper course of conduct should be in any given situation, consult with relevant stakeholders, the interested and affected parties.

## STEP 3: Explore optional solutions

**What is the solution to this problem?**

This step involves formulating and devising a full range of alternatives. This is a vital step towards establishing agreement for the final decision. From the information gathered, alternative actions are formulated. One must look for a number of alternative solutions. The first solution is not necessarily the best one and a few alternatives should be considered.

## STEP 4: Evaluate solutions

**What options do we have? Evaluate and prioritise each solution in accordance with the general interests of those involved.**

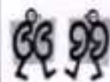

"No problem can stand the assault of sustained thinking."

*Voltaire (François-Marie Arouet), French author, wit and philosopher (1694-1778)*

"Every problem contains within itself the seeds of its own solution."

*Stanley Arnold*

"As long as one keeps searching, the answers come."

*Joari Baez*

## STEP 5: Select and justify a solution

Which is the best solution for all concerned?

There is a time in the life of every problem when it is big enough to see, yet small enough to solve.

Mike Leavitt

Three "ethics checks" to help individuals decide what is right:

1. Is it legal?  
Will I be violating either civil law or company policy?
2. Is it balanced?  
Is it fair to all concerned in the short term as well as the long term?  
Does it promote win-win relationships?
3. How will it make me feel about myself?  
Will it make me proud?  
Would I feel good if my decision was published in the newspaper?  
Would I feel good if my family knew about it?

Blanchard and Peale (1988)

| DECISION CHECKLIST                                                              |  | Yes | No |
|---------------------------------------------------------------------------------|--|-----|----|
| Quiz Question.....                                                              |  | ✓   | X  |
| 1. Does it solve the problem and the root cause?                                |  |     |    |
| 2. Will it realistically accomplish the objectives?                             |  |     |    |
| 3. Does it satisfy all established criteria?                                    |  |     |    |
| 4. Does it satisfy all people involved and affected?                            |  |     |    |
| 5. Can workable action plans be developed to implement it?                      |  |     |    |
| 6. Is there time to implement it?                                               |  |     |    |
| 7. Do the personnel and resources exist to make it work?                        |  |     |    |
| 8. Will its implementation end the recurrence of the problem?                   |  |     |    |
| 9. Have all its risks, disadvantages and possible consequences been considered? |  |     |    |
| 10. Is it the best choice in terms of:                                          |  |     |    |
| a) Benefits                                                                     |  |     |    |
| b) Costs                                                                        |  |     |    |

| e) Workability?                                                                 |  |     |    |

## GROUP EXERCISE

1. What makes an ethical person?
2. Can you think of an unethical role model for the youth of today?
3. Discuss one of the following topics:
  - a. Honesty is the best policy.
  - b. The truth will set you free.
  - c. Honesty is something so tough and tempting. It demands self-denial and spiritual purity. Honesty counts even things that we may think simple and immaterial. Who doesn't sometimes behave dishonestly?
  - d. You are allowed to tell a white lie once in a while to spare someone's feelings; that's not wrong!
  - e. Is giving a bribe dishonest if I have to accomplish something?
4. Discuss one of the following topics:
  - a. Is corporal punishment unethical or immoral?
  - b. Is it ethical to tax the citizens of a country excessively?

**THANK YOU**

"We want that Education by which Character is Formed,  
Strength of mind is increased, the intellect is expanded  
and by which one can stand on one's own feet"  
- Swami Vivekananda

**Value.....?**

Refers to Ethics and Morality

- Refers to Attitude
- Refers to Respect and Trustworthiness
- Refers to Integrity

**Why to Talk about Values.....?**

- The present youth are greatly influenced and affected by the violence, cheating, bribing, disrespect to others and society and unethical practices in the society
- Youth must therefore be guided to inculcate tolerance, peace, respect, caring and honesty at school and college level.

**Why to Talk about Values.....?**

- Institutions should help students to build their 'Character' along with 'Career'
- With Value based education children go through 'Positive Experiences' and 'Empowering Choices'
- What children learn is later reflected in the society

**Character Education**

- Character education often is used synonymously with terms such as moral education, values clarification and moral reasoning
- It has been defined as "the intentional intervention to promote the formation of any or all aspects of moral functioning of individuals"

### Traits of Character Education

- **Responsibility** Being accountable in word and deed. Having a sense of duty to fulfill tasks with reliability, dependability and commitment.
- **Perseverance** Pursuing worthy objectives with determination and patience while exhibiting fortitude when confronted with failure.
- **Caring** Showing understanding of others by treating them with kindness, compassion, generosity and a forgiving spirit.
- **Self-discipline** Demonstrating hard work, controlling your emotions, words, actions, impulses and desires. Giving your best in all situations.
- **Citizenship** Being law abiding and involved in service to school, community and country.

- **Honesty** Telling the truth, admitting wrongdoing. Being trustworthy and acting with integrity.
- **Courage** Doing the right thing in face of difficulty and following your conscience instead of the crowd.
- **Fairness** Practicing justice, equity and equality. Cooperating with one another. Recognizing the uniqueness and value of each individual within our diverse society.
- **Integrity** A firm adherence to a code of especially moral or artistic values. Being honest, trustworthy and incorruptible.
- **Patriotism** A love for and loyalty to one's country.

- **Respect** Showing high regard for an authority, other people, self and country. Treating others as you would want to be treated. Understanding that all people have value as human beings.

### Approaches to effective Character Education

- There are many different approaches for providing meaningful character building experiences for your students, but we will concentrate on the following:
- The Holistic Approach
- The Smorgasbord Approach

### The Holistic Approach

- Values such as fairness, respect, and honesty are part of everyday lessons in and out of the classroom.
- Students are given ample opportunities to practice moral behavior through activities such as service learning.
- Discipline and classroom management concentrate on problem solving rather than rewards and punishments.
- The old model of the teacher-centered classroom is abandoned in favor of democratic classrooms where teachers and students hold class meetings to build unity, establish norms, and solve problems.
- Obviously this is a "best-of-all-worlds" approach and requires a significant commitment from the administration and teaching staff.

### The Smorgasbord Approach

- Service learning
- Approach to teaching in which academic goals are accomplished through community service.
- Explicit instruction in character and values.
- This direct approach is to teach it as a subject within itself, by creating specific character education lesson plans.

### Train the Leader...

- The first step is to train the teachers through Faculty Development Programmes
- Start with a small group and spread it across the teaching community
- Train the Student Leaders and encourage them to lead the student group

### Summary

- Value Based education is the need of the hour
- In the absence of University Requirements for a value based education introduce Voluntary Value Based Education to Students
- Train the Teachers and Develop a system to keep the Value added Education Programmes as a Continuous Process.

THANK YOU

# Educator Ethics

It is essential that educators recognize their unique and influential role in society by following the standards established for their profession.  
Remember to maintain a professional relationship at all times.  
Inform the principal of unusual student behavior and incidents that may need administrative support.  
Keep them apprised of potential parent contacts.

## Think About Your...

- Interactions with students
- Knowledge of college policies and procedures
- Reputation in the community

What is your role and responsibility in maintaining the high ethical standards that define our profession?

Ask participants to think about what they have learned and write a brief reflection to use as an artifact for Standard 8 of the Iowa Teaching Standards. Allow time for participants to share their reflections.

Parents are the first teachers of their children, but teachers are the 2nd most influential in the lives of children.  
- Author Unknown

Teaching is a trusted profession in which society holds teachers to the highest standard as role models.  
In accepting a position of public trust, teachers measure success by the progress of each student toward the realization of his or her potential as an effective citizen.  
The education of college students guides all professional decisions and actions.

To answer that question, we have to begin by looking at

- Values
- Morality
- Professional Code
- Values
- Ethics
- Professional Ethics
- Ethical Responsibilities & Dilemmas

### TEACHERS AS PROFESSIONALS

Duly licensed professionals who possess dignity and reputation with high moral values as well as technical and professional competence. In the practice of their noble profession, they strictly adhere to observe, and practice this set of ethical and moral principles, standard and values.

### Parental Responsibility

The student / pupil while in school, is in the custody and hence, the responsibility of the school authorities as long as he is under the control and influence of the school, whether the semester has not yet begun or has already ended.

### Code of Ethics states

"A teacher shall recognize that the interest and welfare of learners are his first and foremost concern, and shall handle each learner justly and impartially."

### Code of Ethics

- » Code of Ethics of the Education Profession (HEA) The educator, believing in the worth and dignity of each human being, recognizes the supreme importance of the pursuit of truth, devotion to excellence, and the nurture of the democratic principles.
- » Essential to these goals is the protection of freedom to learn and to teach and the guarantee of equal educational opportunity for all.
- » The educator accepts the responsibility to adhere to the highest ethical standards.

- » Code of Ethics of the Education Profession (NEA) The educator recognizes the magnitude of the responsibility inherent in the teaching process.
- » The desire for the respect and confidence of one's colleagues, of students, of parents, and of the members of the community provides the incentive to attain and maintain the highest possible degree of ethical conduct.
- » The Code of Ethics of the Education Profession indicates the aspiration of all educators and provides standards by which to judge conduct.

- » Ethical Issues Human dignity Vulnerable persons Confidentiality and privacy Justice Safety of students Harm and benefits.
- » Respect for Human Dignity Speaks and acts towards all students with respect and dignity; and deals judiciously with them at all times, always mindful of their individual rights and personal sensibilities.
- » Respects the dignity and responsibilities of cooperating teachers, peers, principals, parents and other professionals or para-professionals within the school, school board and community.

» **Respect for Confidentiality and Privacy** Respects the confidential nature of all information related to students and their families and will share such information in an appropriate manner only with those directly concerned with their welfare. Respects the confidential nature of all information related to all school personnel and will share such information in an appropriate manner.

» **Respect for Justice** Respects and recognizes the right of individuals to be treated with fairness and equity and the importance of avoiding conflicts of interest.

» **Respect for Safety of Students** Respects the right of individuals to expect that student teachers will engage in practices that aim to ensure the physical, psychological and emotional safety of students.

» **Balancing Harm and Benefits** Acknowledges that any potentially harmful practices (e.g. lab activities) must be balanced with anticipated benefits and conducted in a prudent informed manner.

THANK YOU

## **Teaching Methodology**

- A teaching method comprises of principles and methods used by teachers to enable student learning. The methods of teaching can be broadly classified into teacher-centered and student-centered. The choice of teaching method depends on the interest of the teacher.
- Following are some teaching methods. From which a teacher has to choose a method or combination of two or more methods, according to the requirement - nature of the course and the level of learners.
- The objective of teaching must always be directed towards achieving the aims of education in general. Whatever subject is taught to the learners, the ultimate aim is to educate the student via teaching that particular subject.

**“A Teacher shall place Premium upon self- respect and self discipline as the principal Of Personal Behaviour in all relationships with others and in all situation.”**

(Code of ethics , Article XI, Section 2)

## Important values in teaching

### Moral

The core of teaching consists of four basic values: dignity, truthfulness, fairness and responsibility & freedom

### Ethics

The ethics of the teaching profession are the moral beliefs and rules about right and wrongs that influence teachers behaviour, attitude and ideals.

- To teach morally is to teach in a manner that accords with notions of what is good or right. That is, to conduct oneself in a way that has moral value.
- To teach morality is to convey to another that which is good or right. In the first instance, the teacher is being a good or righteous person; in the second instance, the teacher is providing to another person the means for becoming a good or righteous person. Once distinguished in this way, the difference between teaching morally and teaching morality seems clear. Unfortunately such clarity does not last long, for there are a host of questions that follow from this distinction.
- One of the key, and thus far implicit benefits of exploring the notions of moral manner and moral content, and the distinction that can be drawn between teaching morally and teaching morality, is that they open up the possibility of our attending to the moral dimensions of teaching without becoming hopelessly entangled in specific moral questions and particular moral creeds.

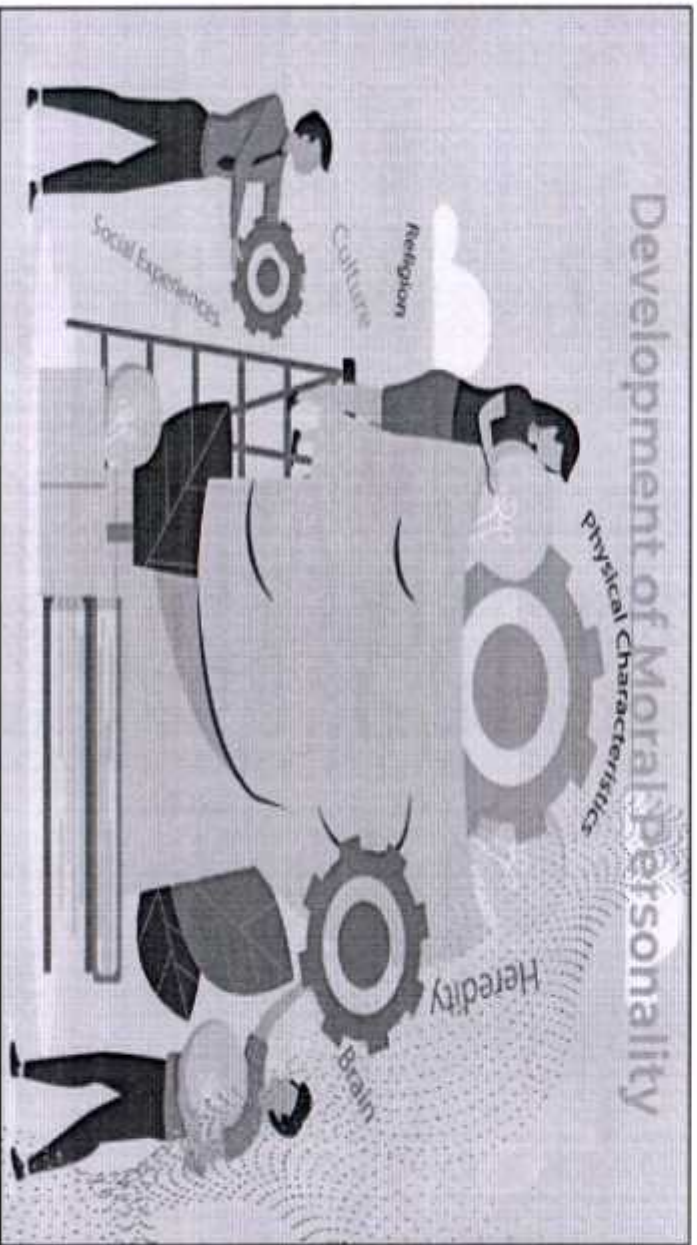

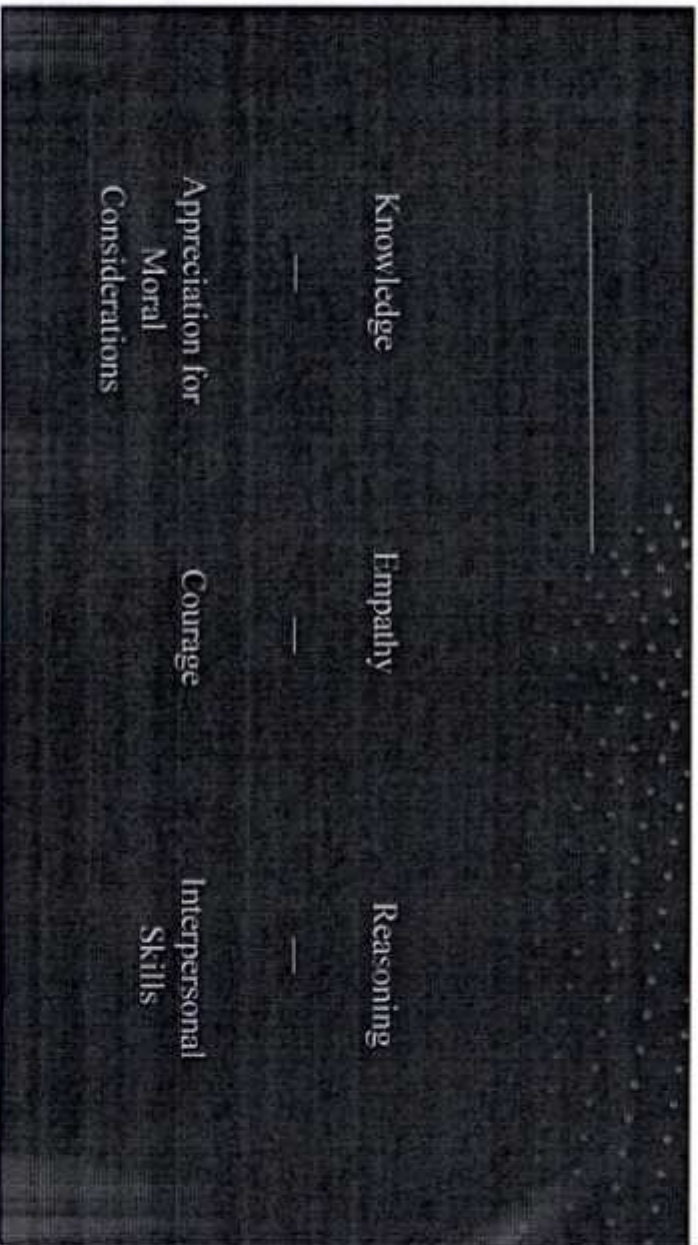

- Moral creeds and moral ideologies cannot be avoided altogether, and we would not want to contend that they should be. Rather, we are in need of ways of describing and analyzing the pedagogical features of morality in teaching, of having some concepts and distinctions that permit us to talk about what is taking place morally in classrooms without becoming lost in one particular moral position or another.
- Equipped with such tools, we then have means to explore the moral work that all teachers are engaged in every day in our nation's classrooms.

- Ethical teachers need to reflect on commonly accepted practices and make individual decisions about responsible teaching behaviors, such as honoring individual differences and respectfully challenging beliefs.
- Other challenges examined in this book include grading, textbook adoption, honor systems, online instruction, and conducting and using research on pedagogy to improve classroom practice.
- Ethics are no walk in the park. While many scenarios are black-and-white, easily solved with clear-cut answers, not every circumstance that a teacher comes across is so simply resolved.

- As a teacher, you may come across decisions that impact an individual's entire life, from family to future. You need to be prepared to deal with that.
- Regardless of the severity of the dilemma, however, every teacher will need to take action based on a code of ethics. A code of ethics is a personal set of guidelines that you'll use to determine the right course of action in a given situation. Although the teaching profession has no formally adopted code of ethics, any code of ethics should comprise six basic elements:

## ***IMPORTANCE OF TEACHER:***

### **• Historical Prospective**

Vashishishth, Sandipani, Vishwamitra,  
Plato, Aristotal, Socretice & Russo....

Counseling of Arjuna by Lord Krishna as a teacher  
on the war of Kurukshetra

Teacher is not common man as "Nirman aur Pralay  
uski god me palte hai".....Chankaya..

Teacher has been the creator of Indian culture in the  
history

Teacher is still the most important pillar of society

15/07/2015

- Two major social changes affecting education are taking place:
  - Changes in demographics
  - Changes in social institutions

- In today's world, all social institutions are experiencing fundamental change:
  - Economics – globalization
  - Politics – new alignments of nations
  - Family – new forms of family life
  - Religion – rise of fundamentalism in all world religions

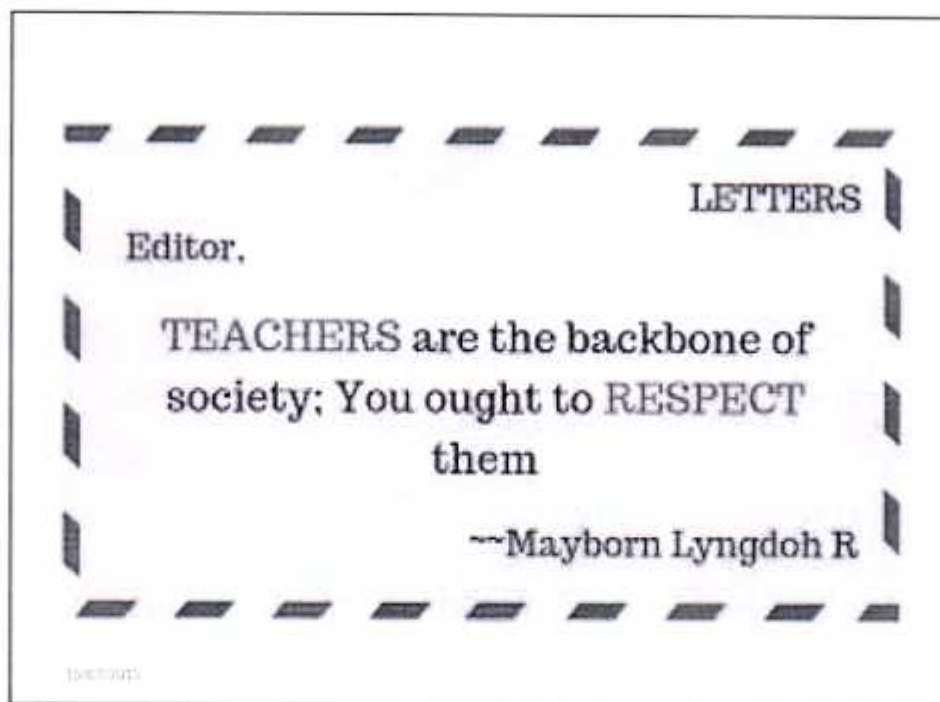

14/07/2015

## Changes in Economics and Politics

- Economically there has been a shift from:
  - Loyalty to a single company to loyalty to one's own self interest
  - A national focus to a global focus
- Politically there has been a shift from:
  - Political interest within our own borders to interest in political events around the world

Submitted to Principal :

Sir,

Sub: Submission of proposal for World environmental day program for approval - reg

World environmental day is celebrated on 5<sup>th</sup> June, every year universally. To commemorate this, our institution has conducted a rally in Puducherry, last year (22.06.2015) with IE (I), Puducherry.

This year, we planned to adopt a village and celebrate "World Environmental Day" by various activities on 7<sup>th</sup> or 8<sup>th</sup> July 2016. In view of this, we have planned to adopt Mangalam village and conduct programs as mentioned below including the budget for each activity.

| No | Particulars                                                                                                                                             | Cost, Rs |

DEPARTMENT OF MECHANICAL ENGINEERING

9 May 2015

Submitted to the Principal:

Sir,

**Sub: Request of approval to host World Environment Day Rally-Reg.**

The Institution of Engineers (I) Puducherry chapter has planned to celebrate "World Environment Day", which falls on 5<sup>th</sup> June 2015 in a grand manner by organizing a mass rally.

The chapter has entrusted the responsibility of hosting the programme to our Institution in the G.B meeting held in Feb2015, in which I am a corporate member.

The rally will be in a convenient date in June 2015. The rally will be flagged off by inviting an eminent personality as guest from Puducherry beach, with about 2000 school students (+2) who will go around Pondicherry main lanes. It is also planned to give a cotton cap with MIT name printed+ Snacks+ certificate to all the participants.

The rally will carry banners having environmental slogans with MIT name + IE Chapter. This is an opportunity to propagate the name of the institution during admission time in Puducherry region.

The Approximate estimate expenditure is Rs 150000 /-

Hence it is requested to grant permission to organize the rally under the banner of MIT.

Kindly the approve the same
